

AMARTYA SINGH

Product Engineer

New Delhi, India | amartyasinghkings07@gmail.com | decocereus.com | linkedin.com/in/amartyasingh07 | github.com/decocereus

Product engineer building backend systems, product interfaces, and developer tooling. Currently owns the coordination layer for a privacy-preserving trading product and previously built cross-chain SDK and UI infrastructure.

EXPERIENCE

Avail — Product Engineer · Remote | Apr 2025–Present

- Own the backend coordination layer for ShieldTX, a privacy-preserving trading product on Hyperliquid, covering trading workflows, live market connections, third-party integrations, operational tooling, and the frontend API.
- Architected the first coordination service and evolved its lifecycle, external-evidence, and recovery paths so multi-service trades can be resumed and operated safely.
- Architected the initial Nexus SDK in TypeScript and built React integration surfaces for cross-chain bridge, send, swap, and execute flows.
- Rebuilt Nexus UI as source-owned shadcn components distributed through a registry, and built Nexus Elements to make the components installable and customizable.
- Automated versioning, changelogs, and npm publishing through a custom release CLI, and established review standards for the TypeScript and React codebase.

GAMP — Frontend Engineer II · Remote | Feb 2024–Apr 2025

- Led frontend delivery during a pivot from a Web3 marketplace to social gaming, helping ship the working MVP in 21 days.
- Built Rewards, Events, Buddies, and Notifications as the platform scaled to approximately 100K users and 10K wallets.
- Integrated Riot authentication and Openfort embedded wallets with session keys; reduced wallet-provisioning latency by approximately 60% through Puppeteer automation.

Mojoboxx — Full Stack Developer · Gurugram, India | Aug 2023–Feb 2024

- Built a Cleartrip-partner hotel booking platform across search, booking, payments, maps, and Paytm/Cleartrip integrations; developed REST APIs, optimized SQL queries, and refactored client state with Redux Toolkit.

Amadeus — iOS Developer · London, UK | Jul 2022–May 2023

- Delivered 10+ Swift, UIKit, and Objective-C features across 20+ airline apps; refactored networking and core components to improve stability and load performance by approximately 15%.

CSRN — Software Engineer Intern · London, UK | Jun–Aug 2020

- Built a project-management prototype with distributed teams across multiple countries.

SELECTED PROJECTS

Volt · usevolt.app — Built and launched an AI ghostwriter for X as a solo product, spanning product design, a web app, browser extension, long-form writing, profile feedback, and image generation.

xtract · xtract.decocereus.com · github.com/decocereus/xtract — Built an open-source tool that converts public X posts and articles into Markdown, plain text, or JSON.

SKILLS

TypeScript, JavaScript, React, Next.js, Node.js, PostgreSQL, Vite, shadcn/ui, Redux Toolkit, Express, REST APIs, WebSockets, npm package development, Puppeteer, Swift, UIKit, Objective-C

EDUCATION & LEADERSHIP

King's College London — B.Sc. (Hons) Computer Science, 2019–2022

Founder-President, KCL Guitar Society · Head of Events, KCL Cyber Security Society · Travel Coordinator, KCL GloCiti
